On the Bus

The bus to Ham Hill is full.
Ned and Meg sit on the top deck of the bus.

Bob puts a big, red bag in the rack.

Kim the lapdog is at the back of the bus.

On The Bus Twinkl (phase 2)

Helicopters

- 9 A helicopter is an aircraft that can go up,
down and to each side.
14 It can spin around, tilt and hover in the air.
24 A helicopter lifts up off the ground due to lots
of blades that spin around a shaft.
34 The air will push the blades and this helps
the helicopter to take off.
50 Helicopters can land in spots that planes
cannot.
62 This means that they can help to drop off
food and treatments when there is a disaster.

Helicopters Twinkl (Phase 5)

The Ship to Cork

- 11 We took the car on the big ship this year and
we set sail to Cork.
16 We got to pull up the chain and toot the horn!
27 The ship had a long deck at the back.
36 We got to look at the fish and the foam
all the way to Cork.
51 It was such good fun.

The Ship to Cork Twinkl (Phase 3)

Different Trains

- 8 High-speed trains do not stop often. They go
on long trips at fast speeds.
14 Some trains go on tracks that are under the
streets.
23 This helps us to not get stuck in car traffic.
24 A monorail is a train that runs on just one
track.
34 They can be up in the air. Some monorail
trains are maglevs.
44 A maglev is a train with magnets that push
the train off the track.

Different Trains Twinkl (Phase 4)

How to Repair a Bicycle Puncture

- 11 You will need: a pump, a bucket of water, tweezers, a
patch kit and an adult to help you.
19 1. Take the wheel off the bike and take the inner tube
out of the tyre (ask an adult to help you with this).
42 2. Blow the tube up using the pump.
57 3. Squeeze the tube gently, listening for a hissing
sound. This will tell you where the puncture is.
64 4. If you can't hear the his, put the tube in a bucket
of water and squeeze gently. Look for the bubbles.
79 5. When you have found the puncture,
use the tweezers to remove
whatever made it.
98 6. Apply a small amount
of glue and a patch
over the hole.

The Duck and the Vet

This duck is not well. She will not quack! I will go with her to see the vet. The vet will check the duck. They will look at her feet, her tail, her neck and her wings. The vet will look after the duck and the duck will be better soon.

The Duck and the Vet

Diary of a Vet

Dear diary,
I got to the clinic at half past eight. My first job was to check on the animals who stayed in overnight. I took the temperature of a poorly dog, and was pleased to see she was much better.

It was a busy morning! I had a rabbit who needed his nails clipping, then a hamster who had a tummy ache and needed some medicine. After that I had a cat who needed an x-ray, a budgie who had a broken wing and a lizard with a sore leg. By lunchtime I was very tired!

How to Take Care of a Dog

- You will need:**
- 8 • two bowls
 - 9 • a long lead
 - 10 • a bed
 - 12 • chewy toys

- How to keep your dog healthy:**
- 30 1. Make sure that your dog has a comfortable bed to sleep in.
 - 51 2. Take your dog outside for a walk every day. Use a long lead so that you can keep your dog safe.
 - 68 3. Find out which food is best for your dog and put it in one bowl.
 - 72 4. Provide fresh water in another bowl.
 - 80 5. Have your dog checked regularly by a vet.
 - 100 6. Play with your dog every day so that it is happy. Your dog might love to play with chewy toys.

Fred's New Friend

Once there lived a dog called Fred. He lived in a house by a stream. He loved eating yummy bones. His favourite thing to do was go for walks. One day while on his walk, he spotted a ginger shape by the stream. He trotted over to the stream and saw it was a little, furry cat. The cat was crying.

"Are you ok?" Fred asked.
"I am lonely and don't have any friends," said the cat.

"Do you want to play with me?" asked Fred.
"Oh yes, please! My name is Tom," said the cat happily.

After that, Fred and Tom became best friends and they played together every day.

Superfood Smoothie

Plants are full of the things that keep us strong and healthy. Treat yourself to a tasty smoothie that is packed full of goodness.

You will need:

- 2 cups of spinach;
- 1 banana (fresh or frozen);
- 1 cup of mango;
- 3 dates (without the seeds);
- 2 tablespoons of nuts or seeds;
- 2 cups of water;
- a blender;
- a cup.

Method

1. First, ask an adult to help you to chop up the banana and mango.
2. Next, add the bananas, mango, spinach, dates and the nuts or seeds into the blender.
3. Pour the water over the mixture.
4. Ask an adult to turn on the blender. Watch as these powerful plants turn into a thick, green liquid.
5. Pour your smoothie carefully into a cup and enjoy!

Recipe for a Healthy Fruit Salad

You will need:

- one juicy, red apple
- three plump strawberries
- a handful of grapes
- one ripe banana
- any other fruit that you enjoy eating
- one cup of fresh, sweet orange juice
- a large, plastic bowl
- a sharp knife for an adult to use
- a spoon

What to do:

- 1) Before you start, make sure that you wash your hands.

- 2) With help from a grown-up, cut up your fruit into small pieces.
- 3) Put the little chunks of fruit into a bowl.
- 4) Pour the orange juice over the fruit until it is all covered.
- 5) Mix the fruit salad and enjoy!

How to Make Fairy Cakes

1 Ingredients

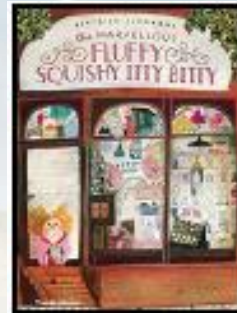

- 4 - 100g self-raising flour
- 6 - 100g sugar
- 8 - 100g butter
- 0 - two eggs
- 2 - icing sugar
- 3 - sprinkles

4 Method

1. Turn the oven on at 180°C or gas mark 4.
2. Mix the sugar and the butter together.
3. Sieve the flour gently into the bowl and fold it into the mixture.
4. Whisk the eggs and stir them into the mixture.
5. Divide the cake mixture evenly between 12 cake cases on a baking tray.
6. Ask a grown-up to help you to put the cakes into the oven for 20 minutes.
7. Take the cakes out of the oven and wait for them to cool.
8. Decorate your cakes with icing sugar and your favourite sprinkles.

Grandad's Trip to Hospital

7 Last Saturday, Grandad felt unwell so Ezra
10 called for help.
18 A paramedic called Ashlee came to our home
23 as quick as a flash.
31 She sat down with Grandad and she asked
34 him how he was feeling.
44 She got lots of things out of her backpack so
46 that she could run some tests on Grandad.
64 She put a mask on Grandad to push fresh air
67 into his lungs.
74 Grandad soon felt much better but Ashlee
76 said that he must go to the hospital to be
88 looked after.

People Who Help Us

There are people who help us every day,
Making lives better in every way.
The nurses working day and night,
They keep you well with spirits bright.

The doctors helping to fix what's wrong,
They cure your ills and make you strong.

Police officers there to look after you,
They keep you safe and others too.

The bus drivers get you there on time,
They drive the bus, come rain or shine!

The teachers who help you learn new things,
They inspire you and give you wings.

Let's stop and think and let them know,
We appreciate how far they go!

Doctor's Orders

Mum: How did you go on at the doctors, Sammy? What did they say?

Sammy: Well, it wasn't good news. The doctor says that I need to get healthier or I will be poorly. I don't do enough exercise and I'm not eating healthy food.

Mum: I thought you were quite healthy. You eat lots of different things and you play outside.

Sammy: I know but it is not enough. I need to eat at least five pieces of colourful, juicy fruit and tasty vegetables every single day. I need to get at least thirty minutes of tiring exercise every single day that makes my heart beat faster and makes me sweaty.

Mum: Let's make more healthy choices together, Sammy.

Ben Gets Lost

Ben and his dad were shopping on the busy high street. "Hold on tight to my hand," said Dad. Ben stopped to look at some toys in a shop window and let go of Dad's hand. When he looked up, he couldn't see Dad anywhere!

Ben felt very worried and didn't know what to do. Then he remembered Dad telling him to look for people in uniforms if you are lost. He saw a lollipop person and asked for help.

The lollipop person was very kind and helped Ben find a friendly police officer. The police officer told Ben not to worry. "We will find your dad," she said.

Advice from a Dentist

It is very important to take good care of your teeth. Strong and healthy teeth will help you to chew and eat the right foods that will help you to grow big and strong. Healthy teeth help you to speak clearly, too.

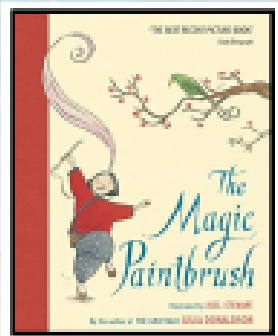

After you eat, germs can stick to your teeth and make something called plaque. Plaque can cause holes to form in your teeth if it is not brushed away regularly. Plaque can also make your gums red and sore. If your gums are not healthy, your teeth may start to wobble or fall out. Make sure that you brush your teeth at least twice per day to keep your mouth clean and fresh.

Super Seeds

Most plants begin their lives as seeds. Even giant trees grow from tiny seeds. This leaves lots of people wanting to know how!

Inside each seed is a mini plant. It is protected by a hard shell called a seed coat. Inside the seed coat, there is food for the plant to use. This mini plant can become a fully-grown plant if it has all the things that it needs. It waits until it has the right levels of water, oxygen, light and heat. When it does, the mini seed begins to grow quickly. This is called germination.

Super Seeds
Twinkl
(Year 2)

Crazy Cacti!

The cactus is a plant that grows where the soil is rocky and dry. They can do this because they have special roots that act like a sponge. The cactus can store lots of water in the body of the plant (stem) and save it for later.

The main root of the cactus is called the taproot. It is longer and stronger than the main root of other plants. It grows deep down into the ground to find water for the cactus, while the smaller roots near the surface soak up any rainwater that falls.

The outside of a cactus can feel waxy. This waxy layer helps the cactus to keep water inside when the weather is hot.

Crazy Cacti!

TWINKL NEWS

OLDEST PLANT EVER IS BROUGHT BACK TO LIFE!

9 This week, clever scientists have managed to grow
17 a narrow-leaved plant from seeds that are almost
20 thirty thousand years old!
30 Found last month in Russia, the old seeds are
39 thought to have been hidden inside burrows
46 by Arctic ground squirrels. By hiding them
55 underground, the squirrels had stopped the seeds
63 from being damaged by the frost. Scientists found
64 more than sixty thousand of them!

72 Working carefully, scientists found out that only
82 three of the seeds still had tiny plants inside. After
90 giving them food, light, warmth and oxygen,
99 scientists were amazingly able to grow the seeds
108 into adult plants. The plants' petals were a shape
111 that humans had never seen before.

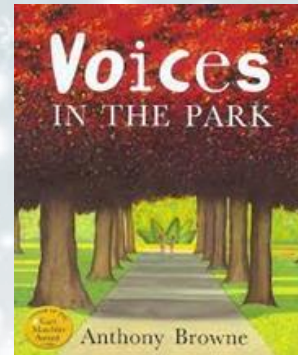

Oldest Plant Ever is brought
back to life.

How to Build a Sandcastle

- 3 You will need:
- 5 • damp sand
- 6 • water
- 10 • a bucket and spade
- 13 • shells or stones
- 22 • Fill the bucket to the top with damp sand.
- 31 • Put the sand down with your hand or spade.
- 42 • Turn your bucket over quickly and place it on the ground.
- 54 • Tap the base of the bucket a few times with your spade.
- 64 • Lift the bucket up slowly to find your tower underneath.
- 6 • Repeat steps 1 to 5 until you are happy with the size of your sandcastle.
- 90 • Dig a moat (a deep trench or channel) around your sandcastle and fill it with water.
- 98 • Use shells or stones to decorate your sandcastle.
